

Hello everyone, and congratulations on making it through this extraordinary fall!

I'd like to give you all a heads up regarding an update coming to the PeopleSoft Financials system, which houses our Grants Management Module we call ROLA.

You may have recently noticed the message on the [log in page](#) alerting you to the fact that we will be rolling out a new interface called FLUID, later this November. You will already be familiar with the FLUID design, as that is what you see when you log into MY HR. FLUID in Financials will be similar.

When you first log in you will land on the Western Financials Home Page. You will use the drop down arrow here, in the top header, to access the ROLA and Research Financials page.

### Approve Proposals Tile:

Depending on your access you will see a variety of different tiles, including a dynamic tile that will advise those with a review or approval role, whether you have any ROLA proposals in your queue.

### Proposals and Awards Tile:

The Proposals and Awards tile will take you to the menu to access the Grants pages you require, which will be similar to what you currently see.
